

Ideation Phase

Define the Problem Statements

Date	30 September 2026
Team ID	SWTID-2026-2091
Project Name	Implement Client Script & UI Policy(incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am an Incident Management user.	I'm trying to create and update incident records easily.	But some fields are not automatically controlled based on the incident information.	Because the Incident form does not have appropriate client-side rules and UI controls.	Which makes me feel confused and increases the possibility of entering incorrect information.
PS-2	I am an Incident Management user.	I'm trying to enter incident details correctly and efficiently.	But unnecessary fields may be visible or required fields may not be properly handled.	Because suitable UI Policies and Client Scripts are not implemented on the Incident form.	Which makes me feel that the incident creation process is difficult and time-consuming.
